

- Engineering staff were also busy last night at the concert letting people know about the upcoming downtown streetscape project that will begin early July.
- All entities involved with valley drainage confirmed they were in favor of moving forward with the one drainage entity idea.
- The Police Department decided to take in one dog at a time they find that would normally go to the Animal Shelter and try and adopt the dog—within a day or two of the first try, they had three takers.
- The Wastewater staff had a rough week with three lift stations going out due to heat (they got them up and running) and accommodating Country Jam last minute with numerous deposits of waste. They are also servicing Loudwire this weekend.
- Speaking of heat, we also had two sections of sidewalk buckle on South Mesa and on South Maple that we are fixing. One buckled one foot high.
- Crews have had to spend a lot of time on the mountain this week—they fixed 1,100 feet of pipe and cleaned up overflowing trash at the campgrounds. Our normal once a week clean up is not enough currently.
- We had a flood in the pump room of the Community Center that submerged the pumps—this resulted in closing the outdoor pool last weekend, but staff was able to fix and resolve the problem.
