Notes
1. Future roads shown on this map serve to illustrate general alignment of the road. There will be many cases where a straight road is neither reasonable nor feasible. Interconnectivity between subdivisions must be clearly demonstrated to meet the transportation goals identified in the community plan.
2. Roadway classifications for roadways outside the City’s growth management area are shown for reference only. Classification and alignment of these roads are administered by Mesa County.
3. Reduced speed zones exist in school zones, commercial districts, and the downtown area to promote multi-modal use and increase safety. Street sections through these zones should be evaluated individually.
4. Future land use shown is based on the community plan and does not necessarily represent existing or future zoning designation.
